

# INSTRUCTIONS

## Turtle Cress Pot

**You will need:** yoghurt pot, compost/soil, cress seeds, green paint, large pompom, small pompoms, googly eyes, PVA glue.

Mix PVA glue with green squeeze paint and paint the outside of the yoghurt pot (the glue helps the paint to stick to the plastic).

Add some compost to the yoghurt pot.

Add your seeds to the compost and push them into the soil. (Make sure to water your plants).

Stick a large pompom to the front of the pot to be a head and 4 little pompoms to be the flippers. Add googly eyes to the head. And let the glue dry.
