

Rubber Band Car

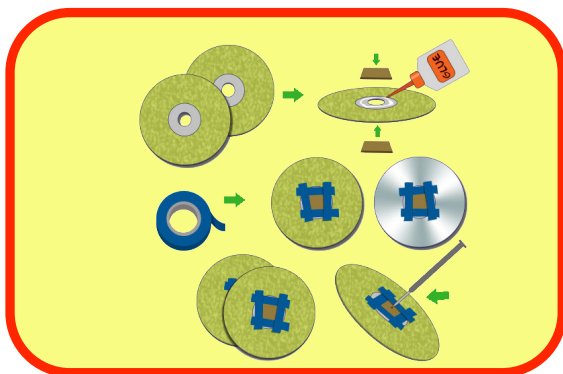

You will need: thick card, rubber band, 2 CDs, plastic bottle tops, candle, scissors, glue, sticky tape, straw, wooden skewer/dowel, template, nail.

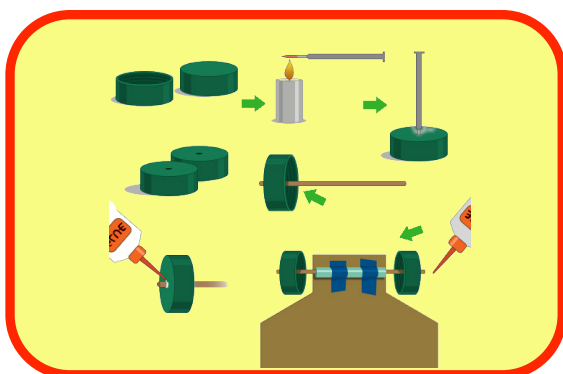

Cut out the template and draw round it onto thick corrugated card. Then cut the card version including the 4 small squares.

Cut the straight part of a straw into 3 equal pieces. Tape them onto the 2 ends of the card, 2 at one end and 1 at the other (don't block their ends).

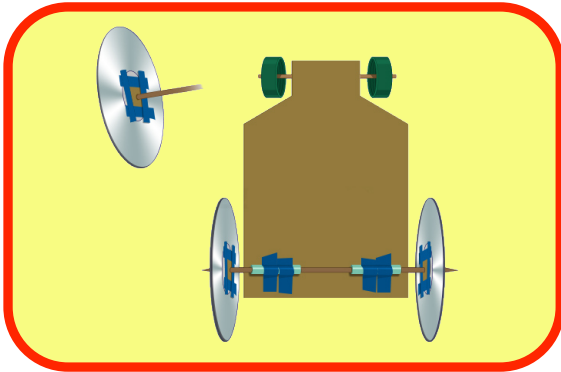

Put glue around the front and back of the holes of both CDs and stick the card squares over the holes on both sides. Secure it with tape. Pierce holes in the centres for the skewer.

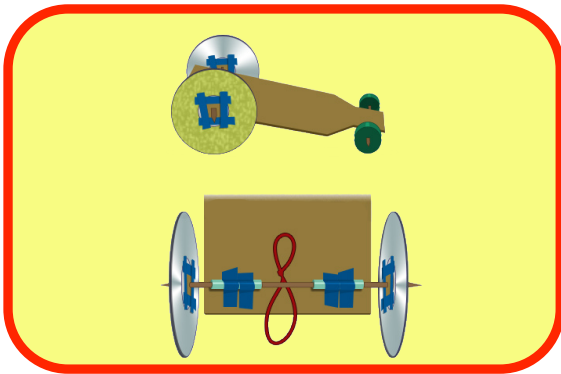

Heat the plastic lids to make them soft enough to push a nail through to make a hole for the skewer. Put the skewer through the front straw and attach the wheels and glue.

INSTRUCTIONS

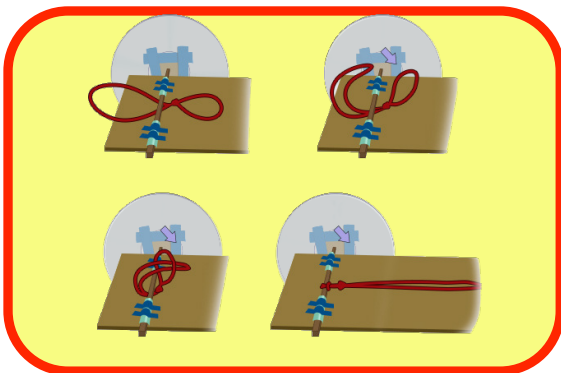

Rubber Band Car

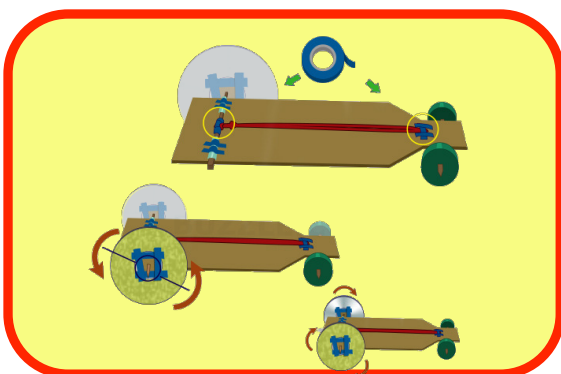

Insert another skewer through the straws at the back and attach a CD on both ends. Secure the CD wheels to the skewers with glue like with the bottle top wheels.

Loop a strong rubber band around the exposed part of the skewer. Tape it in place.

Pull the rubber band to the opposite direction so that it stretches sufficiently and then tape it in place.

It's ready! Pull the car back and watch it zoom forward!
